

GUITAR CENTER PROFESSIONAL

VOCAL CHAIN UPGRADE BUNDLES

PREMIUM PRO Vocal Upgrade Package (Tier 3/Highest Price Point)

Looking for that polished, up-front, “in-pocket” tone from your favorite big-studio recordings? That sound can prove elusive, oftentimes due to the interface. Although most interfaces have good preamps built in, they often lack the professional qualities of a dedicated studio vocal chain. To help you bridge this sonic gap, we meticulously selected large-diaphragm microphones and outboard preamp pairings. Our PREMIUM PRO vocal chain upgrade provides versatile tracking capabilities and the legendary sound of the Neumann TLM 103 Anniversary condenser microphone. When paired with the warm tonal characteristics of the Universal Audio LA-610 MKII channel strip, the combination yields that big-studio console sound for your vocals and instrument recordings.

\$500 SAVINGS

Complete System: ~~\$3,612.98~~ **\$3,112.98**

PLUS PRO Vocal Upgrade Package (Tier 2/Middle Price Point)

Our PLUS PRO vocal chain upgrade is an ideal package for clean, dynamic, present voice recording.

This package combines the clean tonal characteristics of the Neumann TLM 103 condenser microphone with the versatile desktop form factor of the Universal Audio UA-S610 SOLO/610 classic vacuum tube mic preamp. In addition, the Universal Audio UA-S610 SOLO features an onboard DI input and through, making it an ideal choice for capturing professional vocal and instrument tone into your digital audio workstation of choice.

- Complete System: ~~\$2,712.98~~ **\$2,212.98**

STANDARD PRO Vocal Upgrade Package (Tier 1/Lowest Price Point)

Our STANDARD PRO vocal chain upgrade is the most budget-friendly way to get true vintage studio tone without sacrificing a bit of quality. The magic begins with the Warm Audio WA-251 large-diaphragm condenser mic. The WA-251 is based around the iconic CK12 capsule, combined with a Slovak-built JJ 12AY7 vacuum tube and completed with CineMag USA transformers and Wima Film capacitors. This pairing is harmoniously balanced with the Carnhill-driven WA73-EQ British mic preamp and EQ. The result is classic studio tone for vocal and instrument recordings, at an incredible value.

\$300 SAVINGS

Complete System: ~~\$2,111.98~~ **\$1,799.00**

Complete system prices include \$395 for turnkey workstation setup by Guitar Center Professional engineering. In addition to included gear, there are optional add-ons to optimize each system to your specific needs. To ensure bulletproof functionality and quick deployment, we also offer technical services, including system design documentation and remote login support and training. For add-ons and service estimates, please inquire with your Guitar Center Professional account manager or engineer.
